February 7, 1969

Mr. Richard B. Weldon, President
Red Lion Community Association
Rd. #120 Red Lion
New Castle, Delaware 19720

Dear Mr. Weldon:

This is in reply to your letter of February 5 concerning the trash and paper blown about on February 4 at the New Castle County Sanitary Landfill.

Representatives of the State Board of Health were at the Landfill on February 4 and, also, discussed the problem with the New Castle County Engineer. Mr. Westerman also discussed this problem with you by telephone.

From the reports of Mr. Westerman, it appears that the County was taking measures to alleviate the problem by assigning County employees to pick up the paper and by the installation of fences to intercept blowing papers. The State Board of Health has been keeping this installation under close surveillance. We will continue this surveillance.

Please contact us whenever you have any suggestions in regard to the Sanitary Landfill.

Very truly yours,

Donald E. Harneson, Chief
Bureau of Environmental Health
